WINDOW MEASUREMENTS WORKSHEET

1. Using a metal tape measure, measure the width of the window area you would like to cover, typically from curtain rod bracket to bracket.
2. Measure the length from the top of your curtain rod to where you want the bottom edge of your curtain to be — to the sill, the apron, the baseboard, the floor — whatever your personal preference may be.
3. Fill out the handy window measurement chart.

Need Help? Call us at: **1.800.547.7849** 6 a.m. to 1 a.m. Eastern. Closed Christmas, Easter and Thanksgiving.
